VYSOČINA ✶ WITHOUT MAP

## GPS GUIDE TO ATTRACTIONS OF THE REGION

1. GPS guide is designed for Whereigo. Devices, which supported Whereigo are Garmin Oregon, Garmin Colorado and PDA with Windows Mobile 5 or higher.

2. First of all, it is necessary to register on the official website of Groundspeak, which develops Wherigo: http://www.wherigo.com. This registration is free, and then you can download the Wherigo Player (http://www.wherigo.com/player/download.aspx). Wherigo Player is needed for completion of the GPS guide trails. Garmin Oregon and Garmin Colorado Whereigo they have this player installed originally.

3. If you are owner of PDA, install Whereigo player to your device. If you have „only" Windows Mobile 5, you must download even the latest Microsoft NETFramework for PDA. Windows Mobile 6 supports Whereiogo automatically. An obvious requirement is that your PDA (handheld computer, handheld, MDA, smartphone, ...) must has the internal or external GPS. Wherigo is a game strictly requiring GPS.

4. Once you install the Wherigo Player on your device, you can either download our cartridge (the route developed for Vysočina, http://gps-vysocina.upol.cz/pruvodce.html), or any other directly from the Wherigo web pages. Then copy the cartridge to folder Groundspeak / Wherigo / Cartridges.
If you have one of the type of GPS that are described above, just copy cartridge and start your journey.
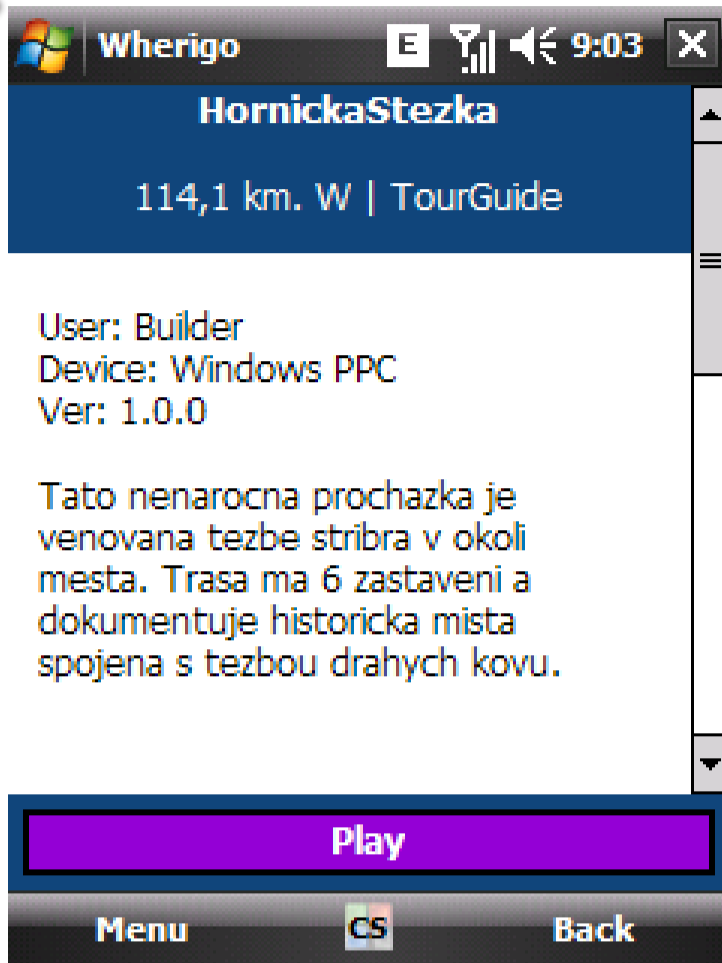

how to?

This is how it should look like. When you start the program the initial Whereigo player window displays with all available routes (cartridge) that you have downloaded from the Internet and saved to a folder Groundspeak / Wherigo / Cartridges.
